

Here's How HulaNet Works

HulaNet provides online asset tracking for existing and new assets, giving instant and secure access to all contract and equipment information twenty-four hours a day, seven days a week. This means a corporate user can log on, view assets at a glance, place service calls, plan renewals, and shop for better pricing – all on the same web site.

Keep track of all of your IT hardware assets – live 7x24. Know where everything is, or where it is supposed to be, who is responsible for that asset, and how much you are paying to maintain it. Know when the contract renews, plan budgets, and do it all with Hula Networks.

The screenshot shows the Hula Networks web interface. On the left is a 'Tools' menu with options like 'Service Call Report', 'Contract Center', 'Add Asset', 'Request a Quote', 'Logout', 'Home', and 'Change Password'. The main area has a search bar with filters for 'Location' (Amsterdam, Buffalo, Chicago) and 'Service Level' (24x7x4 Onsite, 24x7x4 AR- Advanced Replacement, 9x5x4 Onsite, 9x5xNBD Onsite). Below the search bar is a table of results with columns for Request, Supplies, Location, State, Contact, Contract #, Serial Number, Service Level, Mfg, Model, Details, Term, Unit Price, and Tech Support. The table lists four assets with their respective details. At the bottom of the table are buttons for 'Export to CSV' and 'Print'.

Place a service call – online

Print your service agreement OR export to a CSV file – 24x7x365 online

See all of your assets at one time online – shows location, service levels, contract status etc.

See when your contracts are expiring and how much you're paying – instantly online

The Best IT Service Companies with a Single Point of Contact

Hula Networks saves clients time and money through consolidating and managing multi-vendor support contracts.

Hula Networks partners with the best service companies around the globe. We source from OEM, OEM authorized and select third party maintenance organizations to build a service solution suited to your IT asset age and location.

Tired of keeping track of multiple service agreements, renewal dates, and service call placement and escalation procedures?

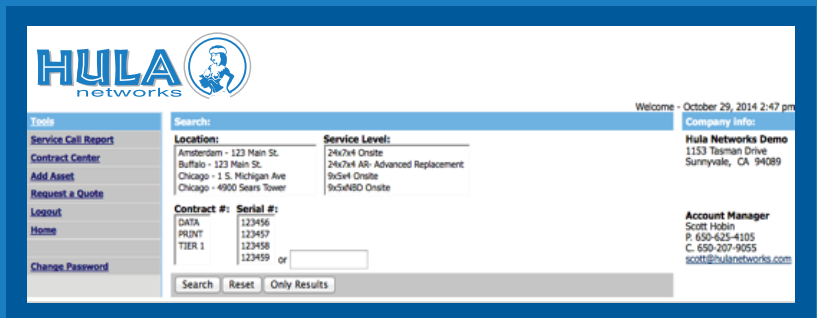

Hula Networks eliminates these normally time consuming inefficiencies through a single web portal. Our staff makes the processes of IT support agreement procurement, utilization, and renewals easier. We enable clients to see all important contract information, place service calls, escalate service calls, look up call history, request equipment additions and deletions, and order supplies. Plus, our dedicated team of customer service professionals monitors every aspect of contract administration and service delivery – so your team does not have to!

Making IT More Manageable

By taking all of these...

And rolling them into this

No longer will you have to navigate multiple websites or 1-800 numbers to manage your systems. Hula Networks roll's IT all into one seamless solution! Through Hula Networks' powerful yet easy-to-use MVS (Multi-Vendor Service) portal, you can see important contract information, place calls, look up call history, track assets, and much more! It's a proven value add with ongoing visibility into each of your systems 24x7.

Manufacturers We Service

Hula Networks has relationships with the industries best-in-class service providers today. With those associations, we have established a global solution with the capability to address nearly all IT equipment manufacturers and models enterprise wide.
