

Do You Need Hula E-Waste Services?

With energy costs rising and landfills overflowing responsible companies are thinking "Green". Do you have storerooms and IT Closets full of decommissioned networking gear and electronics that are taking up valuable space and are a nightmare to catalog and dispose of? Don't waste your valuable time worrying about E-waste. Let the experts at Hula Networks save you time and money.

Hula Networks' electronics recycling process is unparalleled in scale, quality and customer service. Hula Networks evaluates and values equipment and facilitates the removal and responsible recycling of end-of-life and scrap electronics.

COMPUTER, NETWORKING AND SERVER RECYCLING

With 20 years of service in Silicon Valley Hula Networks has the contacts in every market segment. If your equipment has any market-value we know how to maximize any returns available.

- Free Computer, Networking, Server and Test equipment Recycling
- Items with a market value can be resold reducing landfill waste
- E-wasted equipment will be recycled down to plastic and re-useable metals
- Fully certified Toxic Storage and Disposal facilities
- Free Pick Up if You have 10 or more Laptops, Networking Equipment, Servers or Desktops
- Data Center relocation, Expansion and Upgrade services available including rack De-installation

SECURE DATA DESTRUCTION

Per our customer's request, we will securely wipe hard drives and permanently remove privileged data. A CSC Data Destruction Device will perform a seven-pass data wipe in accordance with DoD 5220.22-M standards. By using this process all information is removed from a hard drive and is unrecoverable.

To further eliminate the risks of attempts to reuse or recover data from corporate computers and devices. Our recycling centers can also physically destroy hard drives, cell phones, PDAs, tablets, tapes, flash memory, RAM, ROM, integrated circuits, DVDs, CDs and computer equipment.

Upon completion of the process, a certificate of data destruction is issued. Onsite data destruction services are available for an additional charge.

GENERAL RATES

The prices vary from project to project.

- \$250 per E-Waste pickups, i.e. 4 pallets

Hard drives

- On site shredding is anywhere from \$3.00-\$6.00 depending on quantity.
